

Problem	Stock outs of contraceptives at the district level	
	Outcomes	Assumptions
Quick Win	Uganda MoH signs policy to permit clinical officers to provide tubal ligation in high focus districts	-buy-in by lower levels of government
Outcome 2	Training of clinical officers on tubal ligation	-enough HRH -clinical officers capable of TL -budget and supplies available
Outcome 3	Facilities upgraded to be appropriate for TL	-available space in existing facilities -budget and supplies available
Outcome 4	Inform women of availability/Create demand for TL	-technical expertise available to create demand -no strong opposition to TL (cultural or religious) -potential women are aware of services and can pay/cost-share
Additional Outcomes Identified	Develop Costed Implementation Plan	-Gap analysis in HR -Insurance mechanism
Impact (Groups Choose)	Increased CPR Increased use of TL Decreased Fertility Rate	

Problem	Stock outs of contraceptives at the district level	
	Outcomes	Assumptions
Quick Win	MoH Tanzania issues central mandate to District Governments to budget for contraceptives	<ul style="list-style-type: none"> -districts obey mandate -lack of available contraceptives at district level
Outcome 2	District government develops budget with contraceptives	<ul style="list-style-type: none"> -districts have adequate funding -Relevant data on what is needed are available at the district -champions and advocates play an active role
Outcome 3	Commodities procured and distributed to districts	<ul style="list-style-type: none"> -No stock outs at central stores -Logistics system functions
Outcome 4	Commodities distributed to facilities	<ul style="list-style-type: none"> -service providers exist and are trained -existing demand for services
Additional Outcomes Identified	Trained health providers offer contraceptives to people	
Impact (Provided)	Modern method contraceptive use will increase from previous period.	<ul style="list-style-type: none"> -supply shortages contribute to low CPR -method mix is appropriate to meet demand
